# 1 INTRODUCTION

## PLEASE READ FIRST

Before you start to set and use the timer, always read through these operating instructions carefully.

These operating instructions contain important information that you require for to set and use the timer.

Please keep these operating instructions in a safe place for subsequent reference.

## SAFETY INFORMATION

### DANGER!

Always note and follow all information and notes, especially the safety instructions in this document and in the heater's technical description!

## RANGE OF USES

The EasyStart Select is used to select the operating mode, to set the operating time, and to switch On / Off the heater installed in the vehicle.

### PLEASE NOTE!

Improper use and use outside the specified area of use cancels all liability and warranty.

## GENERAL INFORMATION

The EasyStart Select has a simple operating structure. All functions can be set and, if necessary, changed with only 3 buttons.

If a vehicle was without a power supply (battery disconnected) and the power supply is restored,  for automatic heater detection appears in the display of the EasyStart Select.

If the detection was successful the Start display appears with a flashing heater symbol in the Menu bar and for air heaters with the temperature inside the vehicle.

Use of the EasyStart Select is described in detail [from page 6](#).

## EU DECLARATION OF CONFORMITY

We herewith declare that the control unit placed on the market by us conforms to the applicable provisions of the following EC Directive.

EC Directive 2004/108/EC

The full Declaration of Conformity can be viewed and downloaded from the download centre under [www.eberspaecher.com](http://www.eberspaecher.com)

## 2 OVERVIEW

### EASYSTART SELECT

The EasyStart Select can be used to make the necessary settings for operation of the heater.

### BASIC BUTTON FUNCTIONS

Press the **OK/⏻** button to switch the heater on or off and to confirm actions.

Press the **◀ ▶** buttons to select menu items and make settings.

### LONGPRESS – THE DIRECT WAY

LONGPRESS Press **OK/⏻** for longer than 2 seconds – Heating mode is started immediately.

## 3 OPERATION AND SETTING/ADJUSTMENT

### NOTES ON OPERATION AND SETTING

#### ACTIVATING THE EASYSTART SELECT

If the display is not lit the EasyStart Select must be activated (not if heating ON with LONGPRESS).

SHORTPRESS (less than 2 seconds) on one of the three buttons, the Start display appears in the display, then continue with the operation or setting.

#### ACTIVATING A MENU ITEM

The symbol of the menu item to be activated appears in the display and is flashing.

#### DISPLAY

The display is lit

- during use of the EasyStart Select.
- if terminal 58 is connected, with switched on vehicle lighting.
- if the heater is ON.

#### DISPLAY DISAPPEARS

If the vehicle lighting is switched off, no heater is switched on or if no setting or actuation is made, the display goes out within 10 seconds, i.e. the EasyStart Select switches to standby.

For renewed input, one of the three buttons must be pressed first (not in heating ON with LONGPRESS).

#### FLASHING SYMBOL

A flashing symbol in the Menu bar can be activated with the  button.

#### HEATING ON WITH LONGPRESS

The heater is switched on immediately.

#### CONFIRM SELECTION

Selection of the HEATING  or VENTILATION  menu items must always be confirmed with the  button.

## 3 OPERATION AND SETTING/ADJUSTMENT

### VENTILATION OPERATING MODE

VENTILATION mode is not possible with all heater types (see the Technical Description of the heater for details).

### TEMPERATURE SENSOR

In the case of air heaters the temperature sensor installed in the heater and which is provided for control of the heater can also be used to determine the interior temperature.

**PLEASE NOTE!**

The number of symbols and displays differs depending on the installed heater and feature options.

---

### FACTORY SETTING

#### AIR HEATERS

- Continuous heating operating time
- Temperature setpoint 21 °C

#### WATER HEATERS

- Operating time 60 minutes

## 3 OPERATION AND SETTING/ADJUSTMENT

### START DISPLAY

#### START DISPLAY FOR WATER HEATERS

Menu bar

Status area

#### START DISPLAY FOR AIR HEATERS

Menu bar

Status area

#### MENU BAR

The following menu items are available to choose from for air and water heaters

Symbol	Function
	Heating ON / OFF
	Ventilation ON / OFF

The following symbols are **only** displayed for air heaters

Symbol	Display in the status area
°C or  °F	Temperature inside the vehicle
°C or °F	Temperature setpoint

### PLEASE NOTE!

The symbol for the VENTILATION menu item is only displayed if the heater supports this function.

#### STATUS AREA

If no menu item is activated, the temperature inside the vehicle is displayed in the status area (only with air heaters).

If a menu item (HEATING, VENTILATION) is activated the following appears in the status area:

- the remaining operating time is displayed for water heaters.
- the temperature inside the vehicle and the temperature setpoint are displayed alternately for air heaters in continuous operation.

If during the initial commissioning the installation workshop changed the continuous heating mode to limited time operation, the remaining operating time is displayed in addition to the temperature inside the vehicle and the temperature setpoint.

### 3 OPERATION AND SETTING/ADJUSTMENT

#### HEATING IMMEDIATELY WITH LONGPRESS

Press the  LONGPRESS button for longer than 2 seconds.

HEATER ON

DISPLAY FOR WATER HEATERS

Remaining operating time

DISPLAY FOR AIR HEATERS IN CONTINUOUS HEATING MODE (FACTORY SETTING)
